

Main

Size

It is crucial to take into account the size of the tent as it can greatly impact its overall capacity. Fortunately, Glamphouse offers a variety of tent sizes to cater to your needs.

Base

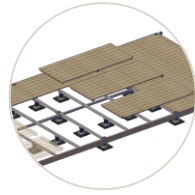

The tent's upper wooden frame is connected with braces or connectors, ensuring a speedy and convenient assembly process and high durability and reliability.

Floor System

Our multi-functional tents have no permanent foundations and do not require building permits. Our models can be easily disassembled, stored, or used again.

Types

Type 1

Metal based flooring system with adjustable plastic legs for 10 cm range levelling, a powder-coated metal frame & connectors, wooden panels for easy floor installation.

Type 2

Wood flooring system will provide a sturdy foundation and allow for a simple and efficient installation of wooden panels.

Interior

Wooden Frame

The wooden frame of the tent is made of Scandinavian pine, which is resistant to temperature changes and treated with oil or paint during manufacturing. Our product range includes more than 30 different color shades for treating wooden parts. Below are 5 top ones.

Metal Bracket

Metal brackets are available in any color from the RAL colors catalog. Below are 5 of the most popular ones.

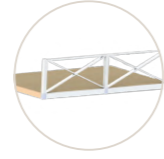

Additions

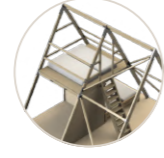

Mosquito Net

The black mosquito net has excellent transparency, so it does not interfere with enjoying the surrounding natural beauty.

Terrace Floor

The primary benefit of having a terrace with your tent is the extra space you will gain for any activity.

Loft

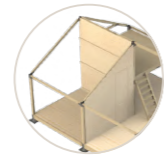

The loft gives you a vast space for a double bed and can also be used as a chill sitting area. It has built-in safety railings to make its use safe.

Roof insulation

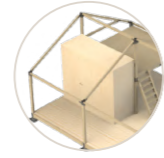

"Glamphouse" uses a patented insulation design that sandwiches a high-grade two-layers insulating foil and double-layered bubble wrap, aluminum lined 7mm on both sides.

WC Module (doesn't include bathroom fittings)

Type 1

Model of two wider wooden walls that can accommodate a bathtub with a shower, a sink with a cabinet, and, of course, a pot.

Type 2

The model has four walls and a ceiling, making it smaller and more compact.

Exterior

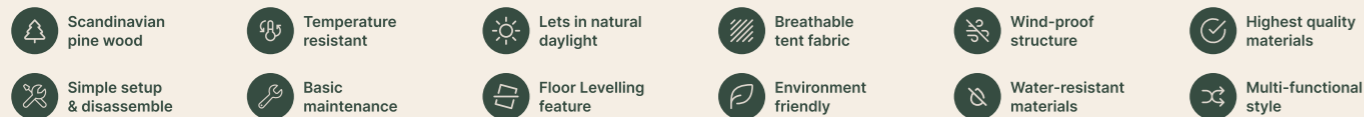

Fabric

The tent fabric consists of 100% Polyacrylonitrile. Polyacrylonitrile (PAN) fiber, one of the essential synthetic fibers, has been widely used because of its good warmth retention and low resistance to light, mildew, etc. In addition, it's mold resistant and very durable. Tent fabric can be changed when ordering three or more tents.

PVC

PVC is available in 36 standard colors; below are the 5 most favorite ones by our clients:

GLAMP HOUSE

We Are Here To Build Your Glampsite

Glamphouse is one of the most established glamping tent manufacturers in Europe. Providing innovative solutions for your glamping venture.
